DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-24, 26-38, 43, 44 and 60-67, drawn to an apparatus.

Group II, claim(s) 68, drawn to a method.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: It should be noted that “[w]hether or not any particular technical feature makes a ‘contribution’ over the prior art, and therefore constitutes a ‘special technical feature,’ should be considered with respect to novelty and inventive step.” See MPEP 1850 Unity of Invention Before the International Searching Authority [R-6]; II. Determination of ‘Unity of Invention.” Consequently, in accordance with MPEP 1850 as cited above, the technical features identified by Applicant do not read over the prior art (US 4,656,788 (to Rhodes et al)).

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- A. Figs. 1-4b.
- B. Fig. 5.
- C. Fig. 6.
- D. Fig. 7.
- E. Fig. 8.
- H. Fig. 9.
- I. Fig. 10-14.
- J. Fig. 15.
- K. Fig. 16.
- L. Fig. 17 and 18.
- M. Fig. 19.
- N. Fig. 20a-20c.
- O. Fig. 21-26.
- P. Fig. 27-28a.
- Q. Fig. 28b.
- R. Fig. 28c.
- S. Fig. 28d.
- T. Fig. 29-30.
- U. Fig. 31.
- V. Fig. 32.
- W. Fig. 33.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Figs. 1-4b correspond to claims 1, 20 and 24.

Fig. 5 corresponds to claim 14.

Fig. 6 corresponds to claims 34 and 35.

Fig. 7 corresponds to claim 12.

Fig. 8 corresponds to claims 13 and 14.

Fig. 9 corresponds to claims 2 and 4.

Fig. 10-14 corresponds to claims 15-19.

Fig. 15 corresponds to claim 6.

Fig. 16 corresponds to claims 5 and 7.

Fig. 17 and 18 corresponds to claims 21-23.

Fig. 19 corresponds to claims 26-29 and 31.

Fig. 20a-20c corresponds to claims 30, 33 and 38.

Fig. 21-26 corresponds to claims 36, 37, 43 and 44.

Fig. 27-28a corresponds to claim 32.

Fig. 28b corresponds to claims 67.

Fig. 28c corresponds to claims 61 and 62.

Fig. 28d corresponds to claims 63.

Fig. 29-30 corresponds to claims 8-11.

Fig. 31 corresponds to claim 65.

Fig. 32 corresponds to claim 66.

Fig. 33 corresponds to claim 60.

The following claim(s) are generic: Claim 1.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The secondary plate; ellipsoid bearing; actuators; and rocker bearings comprise special technical features that are not present in all of the species.

6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

Art Unit: 3723

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

7. The examiner has required restriction between product and process claims.

Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
